DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12, specifically claims 1 & 7, are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: a correlation step between the claimed intent of the method, namely measuring halogen concentration, and the liberated iodine concentration as determined by the measurement of light transmittance. Once iodine is quantified how does it relate to the sought after halogen concentration? Further clarification is required.

3. Claims 23-26 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: any specific structural relationship between any of the claimed elements. Further clarification is required.

4. Claims 23-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 23& 24 recite several elements that provide very minimal structural specificity to the claimed element. For instance, what is the structural description of the reaction section? Is it a test tube? Chamber? Conduit? Because of the absence of as structural description this claimed feature and others are being broadly construed against the claim. Applicant should note that it might be more

appropriate to use means-plus-function language if he does not want to add a structural specificity to the claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 23-26 are rejected under 35 U.S.C. 102(e) as being anticipated by USP 6,040,915 to Wu et al. (herein referred to as “Wu”).

Wu teaches an analysis apparatus for gases that comprises sample/reference cells 2 & 3 (reaction section); sample gas line 31 and reference gas line 32 (introduction tube); exhaust pump 41 (liquid feed pump); control valves 39 & 40 (gas flow rate controller); purge means 14 (gas-liquid separation section); processor 10 (data processor); semiconductor laser 1 (visible light source). See col. 5, line 20-col. 6, line 47.

Response to Arguments

3. Applicant's arguments, see response, filed 12/22/2004, with respect to the rejection(s) of the claim(s) under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of USP 6,040,915.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
